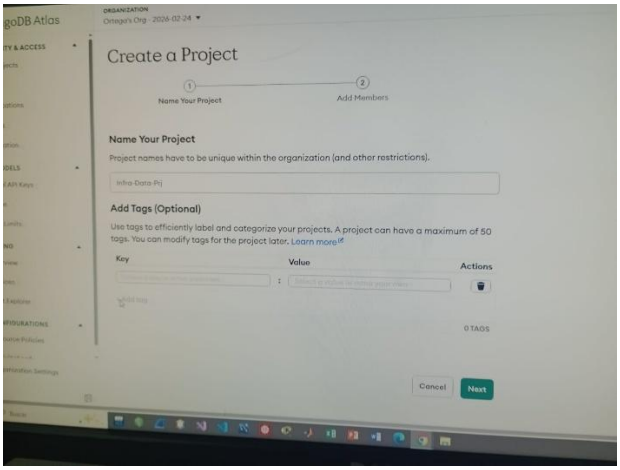
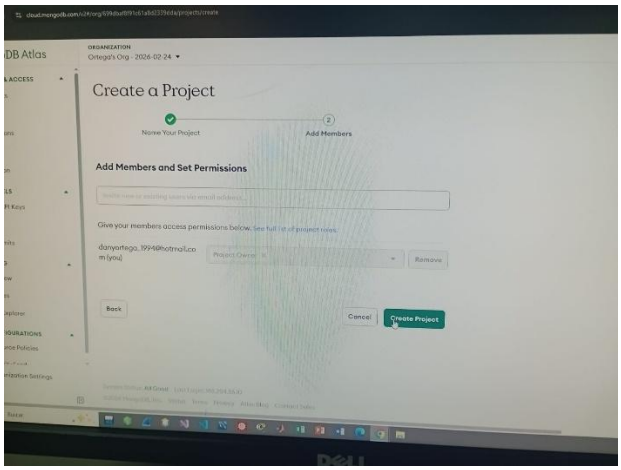
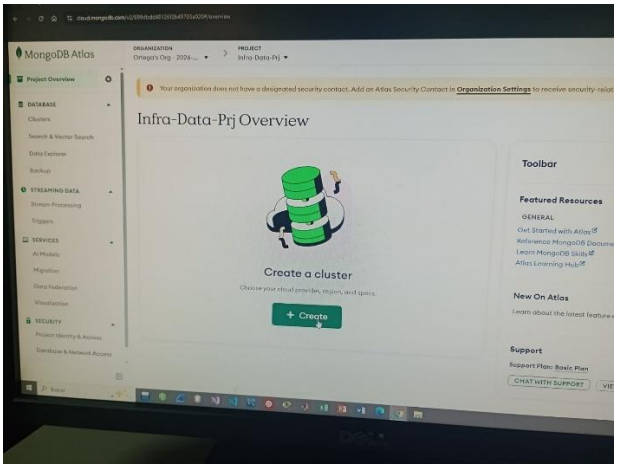
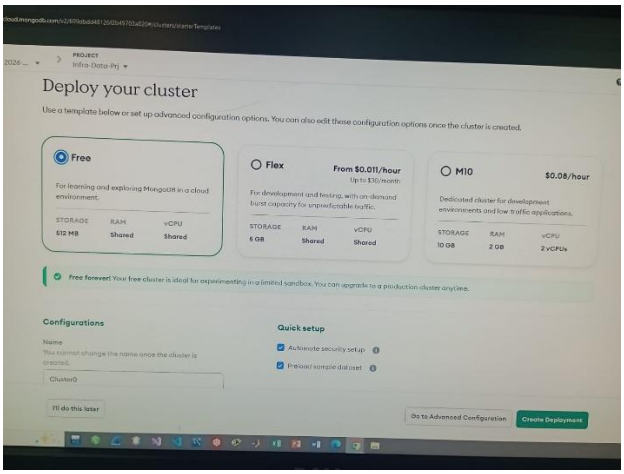
EVIDENCIAS PRACTICA 5:

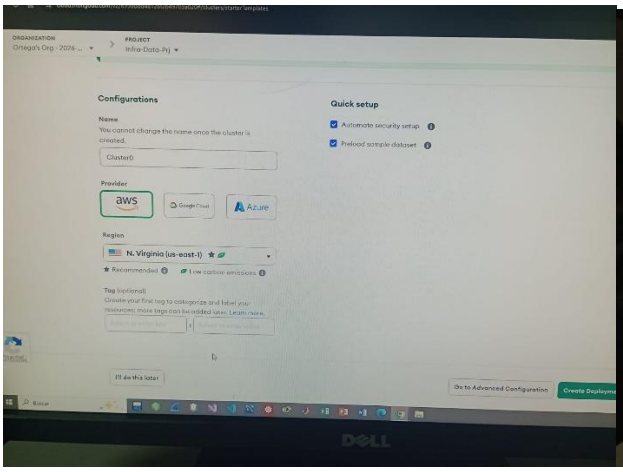
PRIMEROS PASOS EN MONGO DB:

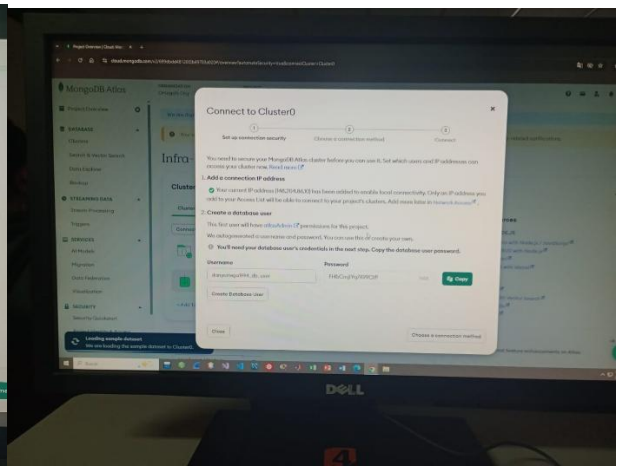


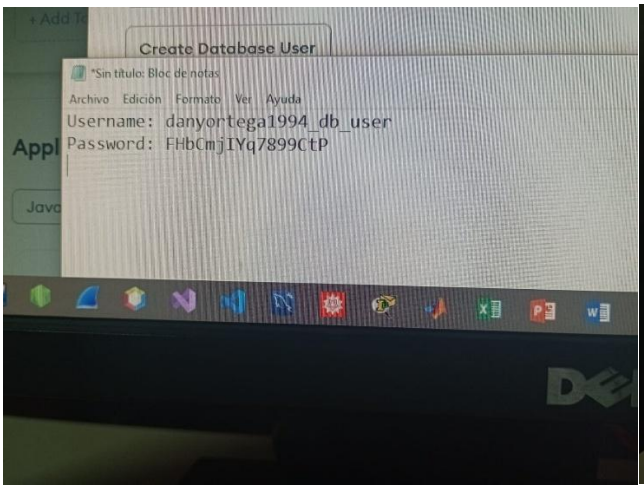




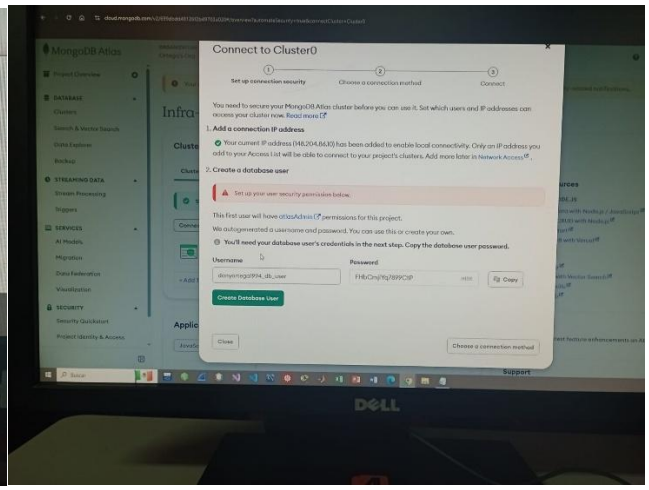








Create Database User
*Sin título: Bloc de notas
Archivo Edición Formato Ver Ayuda
Username: danyortega1994_db_user
Password: FHbCmjIYq7899CtP



Connect to Cluster0
Set up connection security
Choose a connection method
Connect
You need to secure your MongoDB Atlas cluster before you can use it. Set which users and IP addresses can access your cluster now. Read more
1. Add a connection IP address
Your current IP address (148.204.86.10) has been added to enable local connectivity. Only an IP address you add to your Access List will be able to connect to your project's clusters. Add more later in Network Access.
2. Create a database user
Set up your user security permission below.
This first user will have atlasAdmin permissions for this project.
We autogenerated a username and password. You can use this or create your own.
You'll need your database user's credentials in the next step. Copy the database user password.

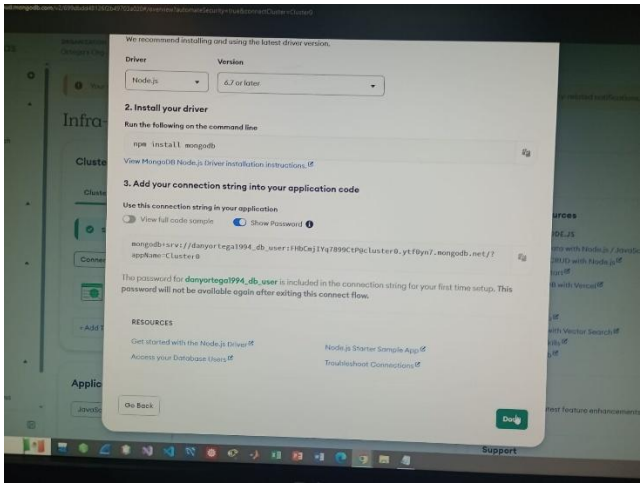
Connecting with MongoDB Driver
1. Select your driver and version
We recommend installing and using the latest driver version.
Driver
Version
Node.js
6.7 or later
2. Install your driver
Run the following on the command line
npm install mongodb
View MongoDB Node.js Driver installation instructions.
3. Add your connection string into your application code
Use this connection string in your application
View full code sample
Show Password
mongodb+srv://danyortega1994_db_user:FHbCmjIYq7899CtP@cluster0.ytf0yn7.mongodb.net/?appName=Cluster0
The password for danyortega1994_db_user is included in the connection string for your first time setup. This password will not be available again after exiting this connect flow.



We recommend installing and using the latest driver version.
Driver
Version
Node.js
6.7 or later
2. Install your driver
Run the following on the command line
npm install mongodb
View MongoDB Node.js Driver installation instructions.
3. Add your connection string into your application code
Use this connection string in your application
View full code sample
Show Password
mongodb+srv://danyortega1994_db_user:FHbCmjIYq7899CtP@cluster0.ytf0yn7.mongodb.net/?appName=Cluster0
The password for danyortega1994_db_user is included in the connection string for your first time setup. This password will not be available again after exiting this connect flow.

npm info using npm@11.9.0
npm info using node@v24.13.0
This utility will walk you through creating a package.json file.
It only covers the most common items, and tries to guess sensible defaults.
See `npm help init` for definitive documentation on these fields
and exactly what they do.
Use `npm install <pkg>` afterwards to install a package and
save it as a dependency in the package.json file.
Press ^C at any time to quit.
